

School Turnaround Program

A CONTRACT MANAGEMENT SERVICE FOR PUBLIC SCHOOL DISTRICTS

A Top-Grade Partnership Between Privatized Schooling & Public School Systems

Specialized Education Services, Inc. (SESI) — one of the top providers of alternative specialized education in the country — offers targeted, customized specialty services to school districts aiming to comprehensively and optimally meet the needs of special needs students in the public school system. One of these services, our **School Turnaround Program**, provides a contract option whereby school districts can fulfill all federal- and state-level education requirements for children facing moderate to severe learning, language, and social challenges, but SESI actually delivers the services on the premises of a public school campus. Essentially, SESI partners with the district by taking over the daily operations of an existing publically funded, district-run school, managing it more efficiently and effectively than the school district's resources and staffing allow. The school district remains in control of all policies and regulations, yet they can rely on SESI's unique educational model and unparalleled expertise to best attend to the country's most challenging student populations. It's a **perfect partnership** that ensures that each student receives the individualized instruction, one-on-one attention, and academic and behavioral interventions they need to meet their IEP goals, under the auspices of the public school system.

★ ★ ★ PROGRAM HIGHLIGHTS ★ ★ ★

- ✓ Single-year or multi-year contracts are available for management of a public school — either the whole school or only designated portions — serving special needs students
- ✓ Student populations served include but are not limited to: SLDs, speech/language deficits, autism spectrum disorders, emotional disturbances, behavioral issues, mental retardation, and various health and neurological impairments
- ✓ All SESI program elements meet all state requirements, with curricula designed to align with state standards and fulfill IEP goals
- ✓ Once SESI's singular, time-proven model is in place, school districts can expect to see improved attendance rates, increased parent satisfaction, and significant grade-level gains in core subject areas in less than one school year's time
- ✓ Comprehensive Behavior Management System is implemented in all our schools, ensuring safety, structure, and discipline
- ✓ Targeted academic interventions incorporate computerized learning, personalized tutorials, and state-of-the-art software and teaching methodologies
- ✓ SESI's education model features small class sizes (8-10 students), even smaller student-to-teacher ratios, and fully qualified and credentialed staff members, from both SESI's and the host school's faculty
- ✓ Full continuum of support services offered on an as-needed basis
- ✓ Students enjoy a full range of extracurricular activities that both engage them and enhance their natural talents and interests
- ✓ Vocational training, life skills programs, and employment preparation services offered to all high-school-aged students
