The Sierra Schools and Academies of California specialize in serving students facing learning, language, and social challenges. As part of a network of schools comprising one of the leading specialized education companies in the country, the Sierra Academy of San Diego puts over two decades of experience to work to provide a safe and nurturing learning environment for students who can best reach their potential in an alternative setting. Students who have had difficulties in traditional classrooms will find a warm and welcoming home here in which to grow and thrive, for our facility's programs are specifically designed to meet the needs of those who learn differently or have identified learning disabilities. And because these students often develop emotional issues related to previous school failures, we balance our customized academic curriculums with effective socialization and behavioral initiatives to expertly address all types of student challenges.

The overarching goal of the Sierra Academy is to help students achieve success in all facets of their lives — in the classroom, at home, and in the community — so we create individualized programs for each of our students that lead to optimum outcomes. Along the way, our students get excited about learning, they form lasting bonds with their team of educators and their peers, and they enjoy an unprecedented sense of accomplishment and heightened self-esteem.
