- ◆ In-House Transportation

The Sierra School of Solano County is dedicated to serving students who have not experienced success in the traditional educational setting as a result of learning, language, and social challenges that require special attention. The Sierra School expertly provides that attention in the form of custom-designed academic programs tailored to their aptitudes and goals, a structured behavioral management system that motivates students to behave responsibly and respectfully toward themselves and others, and a safe, nurturing environment in which these students can strengthen academic abilities, develop social skills, and cultivate proper behaviors. Our primary goal is to expedite the transition of students back to the public school system and into mainstream society, so we focus our efforts on building competence and confidence in each of them to encourage them to achieve higher levels of learning and reach their full potential. Additionally, our life skills curriculum and our WorkAbility transition program prepare our older students for productive and fulfilling futures by providing both on-site technology/equipment training and off-site work experience.

At Sierra School, we believe that nothing is more important to a child's academic and behavioral growth than the pride and self-worth they feel when they accomplish something they didn't believe they could. That's why we strive every day, with every student in our care, to give them every opportunity possible to reap the rewards of personal success — in the classroom, at home, and in the community.
