The High Road Schools and Academies of Maryland specialize in serving students facing learning, language, and social challenges. As part of a network of schools comprising one of the leading specialized education companies in the country, the High Road School of Southern Maryland puts over two decades of experience to work to provide a safe and nurturing learning environment for students who can best reach their potential in an alternative setting. Since we first opened our doors in May 2003, our school has focused on the distinct needs of each learner, which is why we custom-tailor a unique Individualized Education Program (IEP) to each student and then closely monitor the student's progress and skills acquisition, fine-tuning the IEP along the way, as warranted.

The High Road School of Southern Maryland proudly highlights the greatest strengths of our program, like small class sizes, interactive one-on-one instruction, and personalized academic and behavioral interventions. Students requiring supplementary services, such as speech therapy, occupational therapy, or counseling, receive anything and everything they need here, for our overarching goal is to help them achieve success in all facets of their lives — in the classroom, at home, and in the community. We therefore expertly address every challenge we encounter, ultimately working toward optimum outcomes for each student in our care.
